

Josh Radoff Bio:

Josh is co-founder and Principal of YRG sustainability. He has a background in sustainable energy engineering and works at the intersection of the energy, climate, and green building fields. Josh is a regular speaker on sustainability issues and the LEED rating systems and has consulted on scores of sustainability projects for both public and private sector clients, nationally and internationally.

Josh has led a variety of sustainable development projects in the form of strategic guidance, charrette facilitation, design assistance, and technical analysis, with projects ranging from schools to office towers, affordable housing to retail, and new cities and mixed use neighborhoods. His projects have utilized and pursued certification across nearly all of the LEED rating systems.

Josh has also helped corporate and government clients account for their carbon emissions and develop climate change action plans and supported projects participating in the Clean Development Mechanism of the Kyoto Protocol, the Chicago Climate Exchange, and EPA's Climate Leader's program.

Josh was one of the founding directors of GreenHomeNYC, a resource and advocacy group for green building in New York City, and is currently a board member of the Colorado Chapter of the USGBC. He holds Masters' degrees in Mechanical and Electrical Engineering from the Royal Institute of Technology in Stockholm and Columbia University in New York.
