

# NEW! BD+C 251: Understanding the Building Design + Construction LEED Rating Systems

Presented by the U.S. Green Building Council

Gain essential knowledge of the LEED BD+C rating systems, including credit intents, key elements, main requirements, and referenced standards; synergies among credits; and foundations of the LEED certification process, including basic documentation considerations. This workshop addresses the following LEED rating systems: LEED for New Construction & Major Renovations, LEED for Core & Shell, and LEED for Schools. Throughout the day, LEED® Faculty™ engage you in discussions and interactive activities based on real LEED projects to enforce what you've learned.

The rating system is available for free at [www.usgbc.org](http://www.usgbc.org).

## WHO SHOULD ATTEND?

Professionals (architects, engineers, construction managers, contractors, developers, attorneys, etc.) already familiar with the core concepts of LEED; individuals pursuing GBCI's LEED AP BD+C credential; LEED APs following the prescriptive path; LEED APs looking to brush up on the BD+C rating systems.

## LEARNING LEVEL

This is a 200-level class that builds on core LEED concepts, we recommend taking the LEED 201: Core Concepts & Strategies in advance.
