

# Green Building Operations & Maintenance: The LEED Implementation Process

Presented by the U.S. Green Building Council

This workshop is intended for building owners, operators and suppliers who are familiar with the LEED for Existing Buildings: Operations & Maintenance Rating System, but new to implementing it on projects or looking to brush up on implementation best practices. It is also useful for design professionals, investors and others seeking to enhance their existing buildings with green operations. It is appropriate for new LEED APs, as well as those pursuing GBCI's LEED AP Building Operations + Maintenance credential.

## LEARNING OBJECTIVES

After completing this course, you will be able to:

- Communicate the purpose and benefits of the LEED for Existing Buildings: Operations & Maintenance rating system
- Facilitate the LEED process with all stakeholders
- Utilize the tools available to support LEED implementation and documentation
- Successfully develop and implement a plan for LEED certification and recertification

Participants of this workshop are to come prepared with familiarity of the LEED for Existing Buildings: Operations & Maintenance Rating System, which is free on our website. Paid Participants also receive exclusive online access to the Reference Guide. Registered participants will also receive short case studies to review in preparation of the course.

## WHO SHOULD ATTEND?

Building industry professionals seeking to increase their understanding of the LEED for Existing Buildings: Operations & Maintenance Rating System and green building strategies, benefits and resources.

- Architects
- Designers
- Consultants
- Owners
- Engineers
- Facility Managers
- Contractors
- Manufacturers

## LEARNING LEVEL

This is a 300-level course. The 200-level *LEED Core Concepts and Strategies* course is strongly recommended as preparation.
