

Colorado

The Green Building Community

SOUTHERN COLORADO BRANCH

MARCH EVENT

Sustainable Housing

Led by Matt Manzione, join us to learn more about the green aspects of residential development and construction, emphasizing what makes a house "green" and the cost/benefit of green products and practices.

Matt Manzione is the chair of the Colorado Springs Housing and Building Association Smart Green Council, whose mission is "to ensure housing affordability by providing credible and knowledgeable information and resources to members, consumers, regulators and legislators resulting in support for voluntary and cost-effective solutions to homebuyers' demand for green building and design."

Mr. Manzione is a registered Professional Engineer and Licensed General Contractor and has designed and constructed residential, commercial, and industrial projects for over 25 years. He has worked in the power and energy industry, been an environmental consultant, and is now the owner of Mountaintop Custom Homes. Matt has completed several courses in Green Building and Design and made multiple presentations on green construction and sustainability.

All members of USGBC are encouraged to attend
FREE to all USGBC Colorado Members. Non-members \$15.

RSVP for the program at <http://www.usgbccolorado.org/registration/>
